

The owner and company management periodically establish and reviews the Company Quality Policy in accordance with ISO 9001:2015, as well as the aims and context of the organisation. The focus is on supporting the strategic guidelines and relaunch of Omfa Srl.

This policy is diffused and made known through:

- ✓ The Company Management document contained in recorded information.
- ✓ Updating of the document analysing the internal and external context and related stakeholders
- ✓ Posted on bulletin board/website.
- ✓ Presentation/review meetings and other company performance data.
- ✓ Management review documents

Company Management establishes the following general principles to optimise management of the Quality Management System and is committed to ensuring that they are promoted, upheld and implemented by everyone that is a part of Omfa s.r.l.

- ✓ To complete and implement the process of designing moulds for products obtained from aluminium die-casting according to customer specifications, with constantly updated technology.
- ✓ To enhance the company's role and work in terms of experience and expertise, and to ensure that customers benefit from quality, control, and continuous improvement by providing an efficient service.
- ✓ To guarantee full compliance with mandatory regulations;
- ✓ To pay attention to technical solutions to work by using the best available technologies, in order to minimise environmental impact and safety and the health risks of workers with effective management.
- ✓ To provide an effective control throughout all phases of creating moulds for the customer.
- ✓ To ensure efficacious and timely disclosure to all stakeholders;
- ✓ To pursue customer satisfaction and maintenance of a constructive relationship with stakeholders, while ensuring improvement of business performance at the same time;
- ✓ To make employees and staff more aware of the importance of effective training on accident prevention and reporting of potential accidents;
- ✓ To make suppliers more aware of the importance of quality and their conduct with regard to safety and the environment.
- ✓ To cut back on bureaucracy and improve the structure of essential but effective records.
- ✓ To periodically assess risks and opportunities, field of application including the internal/external context through management review documents and internal audit tasks.

To uphold these principles, Omfa has therefore taken the decision to implement and maintain a Quality System according to the relevant standards of reference and give its customers maximum satisfaction.
